

# Star

Follow the 2 steps below. Make a total of 8 “kites”.

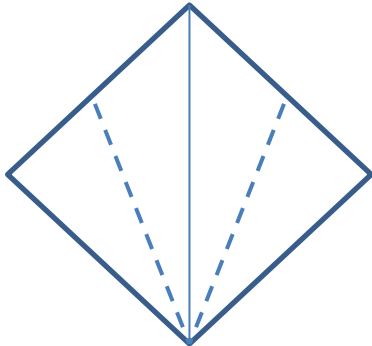

## Step 1:

Using a square piece of paper 3 inches (7.5cm) or less, start with the white side up. Fold in half, corner to corner.

## Step 2:

Carefully fold the two edges to the center fold to make the kite shape.

If desired, you may stop after this step. Glue down the triangle flaps. Then put glue on only 4 of the white triangles on the kite shape. Overlap the remaining 4 white kite triangles over the 4 with the glue to create an 8 point star.

## Step 3 if desired:

Fold outer triangle to previous fold and fold over so one layer of paper (outer layer) is hidden. You should still have a kite shape when done. Glue down the last fold. Refer to the instructions below for gluing and finishing the star.

2. Fold over again to make the kite shape

1. Fold outer layer in
